## 5. FIRE FIGHTING MEASURES

EXTINGUISHING MEDIA	On large fires use dry chemical, foam or water spray. On small fires use carbon dioxide, dry chemical or water spray. Water can be used to cool fire exposed containers.
SPECIAL HAZARDS DURING FIREFIGHTING	Material will not burn unless preheated. Clear area of all non—emergency personnel. Cool hot containers with water. Sufficient cooling with water should be achieved to prevent weakening of containers.
PROTECTIVE EQUIPMENT FOR FIRE FIGHTING	Wear full protective clothing when this material is present in the area of the fire. Determine need to evacuate. Use water spray to keep fire exposed containers cool.

EXPLOSION DATA – SENSITIVITY TO STATIC DISCHARGE	NA

## 6. ACCIDENTAL RELEASE MEASURES

SPILL PROCEDURES	Soak up spilled product with absorbent material such as clay, sand or suitable material.. Place in a container and seal tightly for proper disposal. For large spills use vacuum trucks or pump to storage/salvage vessels. Any residue should be absorbed onto absorbent material as above.
PERSONAL PRECAUTIONS	Wear chemical goggles, body-covering protective clothing, chemical resistant gloves and rubber boots. Use a NIOSH-approved dust and mist respirator where spray mist occurs.
ENVIRONMENTAL PRECAUTIONS	Prevent the material from entering drains or watercourses. Notify authorities if spill has entered watercourse or sewer.

## 7. HANDLING AND STORAGE

HANDLING	Avoid contact with eyes, skin and clothing. May cause skin sensitization. Wash with soap and water before eating, drinking applying cosmetics or using toilet facilities. Launder contaminated clothing before use. Leather articles cannot be decontaminated and should be discarded. Avoid breathing mist. Keep container closed. Promptly clean up spills.
STORAGE	Store in a cool, dry place with adequate ventilation. . Keep containers closed when not in use. Keep away from open flames and high temperatures.

## 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROL MEASURES	Use with adequate ventilation. Keep containers closed. Safety shower and eyewash fountain should be within direct access.
RESPIRATORY PROTECTION	No respiratory protection is required during normal conditions of use.
HAND PROTECTION	Chemical resistant gloves should be worn during all handling operations.
EYE PROTECTION	Chemical goggles should be worn, if there is potential of contact with eyes.
BODY PROTECTION	Discard contaminated protective equipment. If there is danger of splashing, wear overall or apron.
PROTECTION DURING APPLICATION	During application, adequate ventilation must be provided. Mix in a well-ventilated area. If ventilation is poor, wear respiratory protection. Dries to form glass film which can easily cut the skin. Spilled material is very slippery. Can etch glass if not promptly removed.
